Equations

Additive Commutative Law

$$a + b = b + a \quad (1)$$

for instance:

$$\frac{1}{2} + \frac{3}{4} = \frac{3}{4} + \frac{1}{2} \quad (2)$$

Theorem

Pythagorean Theorem

Theorem

The sum of the squares on the legs of a right triangle is equal to the square on the hypotenuse.

$$a^2 + b^2 = c^2$$
